

# TEST BANK

**TEST BANK CLINICAL NURSING SKILLS AND TECHNIQUES, 10TH EDITION BY ANNE GRIFFIN PERRY**

**TABLE OF CONTENTS**

Chapter 1: Using Evidence in Nursing Practice Nursing School Test Banks

Chapter 2: Admitting, Transfer, and Discharge Nursing School Test Banks

Chapter 3: Communication Nursing School Test Banks

Chapter 4: Documentation and Informatics Nursing School Test Banks

Chapter 5: Vital Signs Nursing School Test Banks

Chapter 6: Health Assessment Nursing School Test Banks

Chapter 7: Medical Asepsis Nursing School Test Banks

Chapter 9: Safe Patient Handling, Transfer, and Positioning Nursing School Test Banks

Chapter 10: Exercise and Ambulation Nursing School Test Banks

# Chapter 1: Using Evidence in Nursing Practice Nursing School Test Banks

## MULTIPLE CHOICE

1. Evidence-based practice is a problem-solving approach to making decisions about patient care that is grounded in:

- a. the latest information found in textbooks.
- b. systematically conducted research studies.
- c. tradition in clinical practice.
- d. quality improvement and risk management data.

ANS: B

2. When evidence-based practice is used, patient care will be:

- a. standardized for all.
- b. unhampered by patient culture.
- c. variable according to the situation.
- d. safe from the hazards of critical thinking.

ANS: C

3. When a PICOT question is developed, the letter that corresponds with the usual standard of care is:

- a. P.
- b. I.
- c. C.
- d. O.

ANS: C

4. A well-developed PICOT question helps the nurse:

- a. search for evidence.
- b. include all five elements of the sequence.
- c. find as many articles as possible in a literature search.
- d. accept standard clinical routines.

ANS: A

5. The nurse is not sure that the procedure the patient requires is the best possible for the situation. Utilizing which of the following resources would be the quickest way to review research on the topic?

- a. CINAHL
- b. PubMed
- c. MEDLINE
- d. The Cochrane Library

ANS: D

6. The nurse is getting ready to develop a plan of care for a patient who has a specific need. The best source for developing this plan of care would probably be:

- a. The Cochrane Library.
- b. MEDLINE.
- c. NGC.
- d. CINAHL.

ANS: C

7. The nurse has done a literature search and found 25 possible articles on the topic that she is studying. To determine which of those 25 best fit her inquiry, the nurse first should look at:

- a. the abstracts.
- b. literature reviews.
- c. the Methods sections.
- d. the narrative sections.

ANS: A

8. The nurse wants to determine the effects of cardiac rehabilitation program attendance on the level of postmyocardial depression for individuals who have had a myocardial infarction. The type of study that would best capture this information would be a:

- a. randomized controlled trial.
- b. qualitative study.
- c. case control study.
- d. descriptive study.

ANS: B

9. Six months after an early mobility protocol was implemented, the incidence of deep vein thrombosis in patients was decreased. This is an example of what stage in the EBP process?

- a. Asking a clinical question
- b. Applying the evidence
- c. Evaluating the practice decision
- d. Communicating your results

ANS: C

### **MULTIPLE RESPONSE**

1. To use evidence-based practice appropriately, you need to collect the most relevant and best evidence and to critically appraise the evidence you gather. This process also includes: *(Select all that apply.)*

- a. asking a clinical question.
- b. applying the evidence.
- c. evaluating the practice decision.
- d. communicating your results.

ANS: A, B, C, D

2. In a clinical environment, evidence-based practice has the ability to improve: *(Select all that apply.)*

- a. the quality of care provided.
- b. patient outcomes.
- c. clinician satisfaction.
- d. patients perceptions.

ANS: A, B, C, D

3. During the application stage of evidence-based practice change, it is important to consider: (*Select all that apply.*)

- a. cost.
- b. the need for new equipment.
- c. management support.
- d. adequate staff.

ANS: A, B, C, D

#### COMPLETION

1. \_\_\_\_\_ is a guide for making accurate, timely, and appropriate clinical decisions.

ANS:

Evidence-based practice

2. Evidence-based practice requires good\_\_\_\_\_.

ANS: nursing judgment

3. While caring for patients, the professional nurse must question\_\_\_\_\_.

ANS: what does not make sense

4. A systematic review explains whether the evidence that you are searching for exists and whether there is good cause to change practice. In\_\_\_\_\_, all entries include information on systematic reviews. Individual randomized controlled trials (RCTs) are the gold standard for research.

ANS: The Cochrane Library

5. \_\_\_\_\_ are the gold standard for research.

ANS: Randomized controlled trials

6. The researcher explains how to apply findings in a practice setting for the types of subjects studied in the \_\_\_\_\_ section of a research article.

ANS:

Clinical Implications

7. \_\_\_\_\_ is the extent to which a study's findings are valid, reliable, and relevant to your patient population of interest.

ANS: Scientific rigor

8. Patient fall rates are an example of a \_\_\_\_\_ type of study in the evidence hierarchy.

ANS: quality improvement data

## Chapter 2: Admitting, Transfer, and Discharge Nursing School Test Banks

### MULTIPLE CHOICE

1. The patient is scheduled to go home after having coronary angioplasty. What would be the most effective way to provide discharge teaching to this patient?

- a. Provide him with information on health care websites.
- b. Provide him with written information on what he has to do.
- c. Sit and carefully explain what is required before his follow-up.
- d. Use a combination of verbal and written information.

ANS: D
