Chapter 4. Communication

Chapter 5. Nursing Process and Critical Thinking

Chapter 6. Cultural and Ethnic Considerations

Unit II: Fundamentals of Clinical Practice

Chapter 7. Asepsis and Infection Control

Chapter 8. Body Mechanics and Patient Mobility

Chapter 9. Hygiene and Care of the Patient's Environment

Chapter 10. Safety

Chapter 11. Admission, Transfer, and Discharge

Unit III: Introduction to Nursing Interventions

Chapter 12. Vital Signs

Chapter 13. Physical Assessment

Chapter 14. Oxygenation

Chapter 15. Elimination and Gastric Intubation

Chapter 16. Care of Patients Experiencing Urgent Alterations in Health

Chapter 17. Dosage Calculation and Medication Administration

Chapter 18. Fluids and Electrolytes

Chapter 19. Nutritional Concepts and Related Therapies

Chapter 20. Complementary and Alternative Therapies

Chapter 21. Pain Management, Comfort, Rest, and Sleep

Chapter 22. Surgical Wound Care

Chapter 23. Specimen Collection and Diagnostic Testing

Unit IV: Nursing Care across the Life Span

Chapter 24. Lifespan Development

Chapter 25. Loss, Grief, Dying, and Death

Chapter 26. Health Promotion and Pregnancy

Chapter 27. Labor and Delivery

Chapter 28. Care of the Mother and Newborn

Chapter 29. Care of the High-Risk Mother, Newborn, and Family with Special Needs

Chapter 30. Health Promotion for the Infant, Child, and Adolescent

Chapter 31. Basic Pediatric Nursing Care

Chapter 32. Care of the Child with a Physical and Mental or Cognitive Disorder

Chapter 33. Health Promotion and Care of the Older Adult

Unit V: Fundamentals of Mental Health Nursing

Chapter 34. Concepts of Mental Health

Chapter 35. Care of the Patient with a Psychiatric Disorder

Chapter 36. Care of the Patient with an Addictive Personality

Unit VI: Fundamentals of Community Health Nursing

Chapter 37. Home Health Nursing

Chapter 38. Long-Term Care

Chapter 39. Rehabilitation Nursing

Chapter 40. Hospice Care

Unit VII: Adult Health Nursing

Chapter 41. Introduction to Anatomy and Physiology

Chapter 42. Care of the Surgical Patient

Chapter 43. Care of the Patient with an Integumentary Disorder

Chapter 44. Care of the Patient with a Musculoskeletal Disorder

Chapter 45. Care of the Patient with a Gastrointestinal Disorder

Chapter 46. Care of the Patient with a Gallbladder, Liver, Biliary Tract, or Exocrine Pancreatic Disorder

Chapter 47. Care of the Patient with a Blood or Lymphatic Disorder

Chapter 48. Care of the Patient with a Cardiovascular or a Peripheral Vascular Disorder

Chapter 49. Care of the Patient with a Respiratory Disorder

Chapter 50. Care of the Patient with a Urinary Disorder

Chapter 51. Care of the Patient with an Endocrine Disorder

Chapter 52. Care of the Patient with a Reproductive Disorder

Chapter 53. Care of the Patient with a Visual or Auditory Disorder

Chapter 54. Care of the Patient with a Neurological Disorder

Chapter 55. Care of the Patient with an Immune Disorder

Chapter 56. Care of the Patient with HIV/AIDS

Chapter 57. Care of the Patient with Cancer

Unit VIII: From Graduate to Professional

Chapter 58. Professional Roles and Leadership

Unit I: Fundamentals of Nursing

Chapter 1: The Evolution of Nursing

Foundations and Adult Health Nursing 8th Edition Kim Cooper Kelly Gosnell

MULTIPLE CHOICE

1. What is a nursing program considered when certified by a state agency?

a.	Accredited
b.	Approved
c.	Provisional
d.	Exemplified

ANS: B

Approved means certified by a state agency for having met minimum standards; *accredited* means certified by the NLN for having met more complex standards. Provisional and exemplified are not terms used in regard to nursing program certification.

2. Which of the following must the nurse recognize regarding the healthcare delivery system?

a.	It includes all states.
b.	It affects the illness of patients.
c.	Insurance companies are not involved.
d.	The major goal is to achieve optimal levels of health care.

ANS: D

or RN.

The nurse must recognize that in the health care delivery system, the major goal is to achieve optimal levels of health care. The health care system consists of a network of agencies, facilities, and providers involved with health care in a specified geographic area. Insurance companies do have involvement in the health care system. The illness of patients is not necessarily affected by the health care system.

3. What is required by the health care team to identify the needs of a patient and to design care to meet those needs?

a.	The Kardex
b.	The physician's order sheet
c.	An individualized care plan
d.	The nurse's notes

ANS: C

An individualized care plan involves all health care workers and outlines care to meet the needs of the individual patient. The Kardex, physician's order sheet, and nurse's notes do not identify the needs of the patient nor are they designed to assist all members of the health care team to meet those needs.

4. Patient care emphasis on wellness, rather than illness, begins as a result of:

a.	increased education concerning causes of illness.
b.	improved insurance payments.
c.	decentralized care centers.
d.	increased number of health care givers.

ANS: A

The acute awareness of preventive medicine has resulted in today's emphasis on education about issues such as smoking, heart disease, drug and alcohol abuse, weight control, and mental health and wellness promotion activities. This preventive education has resulted in an emphasis on wellness, rather than illness. Improved insurance payments, decentralized care centers, and increased

or RN.

numbers of health care givers did not influence an emphasis on wellness.

5. What is the most effective process to ensure that the care plan is meeting the needs of the patient?

a.	Documentation
b.	Communication
c.	Evaluation
d.	Planning

ANS: B

Communication is the primary essential component among the healthcare team to evaluate and modify the care plan. Documentation, evaluation, and planning are not primary essential components to

6. How does an interdisciplinary approach to patient treatment enhance care?

a.	By improving efficiency of care
b.	By reducing the number of caregivers
c.	By preventing the fragmentation of patient care
d.	By shortening hospital stay

ANS: C

An interdisciplinary approach prevents fragmentation of care. An interdisciplinary approach does not improve the efficiency of care, reduce the number of caregivers, or shorten hospital stay.
