TEST BANK

Test Bank For Gerontologic Nursing 6th Edition - By Authors: Sue Meiner, and Jennifer Yeager

eBook ISBN: 9780323498098

Paperback ISBN: 9780323498111

Paperback ISBN: 9780323848381

Table of Contents

Part I: Introduction to Gerontologic Nursing

- 1. Overview of Gerontologic Nursing
- 2. Theories Related to Care of the Older Adult
- 3. Legal and Ethical Issues
- 4. Assessment of the Older Adult

Part II: Influences on Health and Illness

- 5. Cultural Influences
- 6. Family Influences
- 7. Socioeconomic and Environmental Influences
- 8. Health Promotion and Illness/Disability Prevention

Part III: Influences on Quality of Life

- 9. Nutrition
- 10. Sleep and Activity
- 11. Safety
- 12. Sexuality and Aging

- 13. Pain
- 14. Infection and Inflammation

Part IV: Diagnostic Studies and Pharmacologic Management

- 15. Laboratory and Diagnostic Tests
- 16. Drugs and Aging

Part V: Nursing Care of Physiologic and Psychologic Disorders

- 17. Integumentary Function
- 18. Sensory Function
- 19. Cardiovascular Function
- 20. Respiratory Function
- 21. Gastrointestinal Function
- 22. Urinary Function
- 23. Musculoskeletal Function
- 24. Cognitive and Neurologic Function
- 25. Endocrine Function

Part VI: Health Care Transitions

- 26. Health Care Delivery Settings and Older Adults
- 27. Chronic Illness and Rehabilitation
- 28. Cancer
- 29. Loss and End-of-Life Issues

Chapter 01: Overview of Gerontologic Nursing Meiner: Gerontologic Nursing, 6th Edition

MULTIPLE CHOICE

- 1. In 2010, the revised *Standards and Scope of Gerontological Nursing Practice* was published. The nurse would use these standards to
 - a. promote the practice of gerontologic nursing within the acute care setting.
 - b. define the concepts and dimensions of gerontologic nursing practice.
 - c. elevate the practice of gerontologic nursing.
 - d. incorporate the concepts of health promotion, health maintenance, disease prevention, and self-care

ANS: D

The current publishing of the *Standards and Scope of Gerontological Nursing Practice* in 2010 incorporates the input of gerontologic nurses from across the United States and includes comprehensive concepts and dimensions important to those practicing gerontologic nursing. It was not intended to promote gerontologic nursing practice within acute care settings, define concepts or dimensions of gerontologic nursing practice, or elevate the practice of gerontologic nursing.

DIF: Remembering OBJ: 1-1 TOP: N/A

MSC: Safe and Effective Care Environment

- 2. When attempting to minimize the effect of ageism on the practice of nursing older adults, a nurse needs to first $N_{IJ}R_{S}I_{N}G_{T}B \cdot C_{O}M$
 - a. recognize that nurses must act as advocates for aging patients.
 - b. accept that this population represents a substantial portion of those requiring nursing care.
 - c. self-reflect and formulate one's personal view of aging and the older patient.
 - d. recognize ageism as a form of bigotry shared by many Americans.

ANS: C

Ageism is an ever-increasing prejudicial view of the effects of the aging process and of the older population as a whole. With nurses being members of a society holding such views, it is critical that the individual nurse self-reflects on personal feelings and determines whether such feelings will affect the nursing care that he or she provides to the aging patient. Acting as an advocate is an important nursing role in all settings. Simply accepting a fact does not help end ageism, nor does recognizing ageism as a form of bigotry.

DIF: Applying OBJ: 1-6 TOP: Integrated Process: Teaching-Learning MSC: Safe and Effective Care Environment

- 3. The nurse planning care for an older adult who has recently been diagnosed with rheumatoid arthritis views the priority criterion for continued independence to be the patient's
 - a. age.
 - b. financial status.
 - c. gender.
 - d. functional status.

Gerontologic Nursing 6th Edition Meiner Test Bank

ANS: D

Maintaining the functional status of older adults (especially those with chronic health conditions) may avert the onset of physical frailty and cognitive impairment, two conditions that increase the likelihood of institutionalization.

DIF: Remembering OBJ: 1-4

TOP: Nursing Process: Planning MSC: Physiologic Integrity

- 4. A nurse working with the older adult population is most likely to assess a need for a financial social service's referral for which person?
 - a. White male
 - b. Black female
 - c. Hispanic male
 - d. Asian American female

ANS: B

The poverty rate among older women is substantially higher than that seen among men. The poverty rates for people of color is higher than that of whites.

DIF: Remembering OBJ: 1-4

TOP: Nursing Process: Assessment MSC: Safe and Effective Care Environment

- 5. A nurse is preparing to complete a health assessment and history on an older patient. Which statement reflects an understanding of the general health status of this population?
 - a. "I'll need to document the medications the patient is currently prescribed."
 - b. "I would like to understand how supportive the patient's family members are."
 - c. "Most older patients are being treated for a variety of chronic health care issues."
 - d. "It will be interesting to see whether this patient sees herself as being healthy."

ANS: D

It is a misconception that old age is synonymous with disease and illness. In fact, older adults already tend to view their personal health positively despite the presence of chronic illness, disease, and impairment. The nurse should always determine the patient's sense of wellness and independence when conducting a health and history assessment. An assessment of medication use and family support is important for any patient. Many older adults do have chronic health conditions, but their perception is more important than a single number.

DIF: Applying OBJ: 1-4 TOP: Nursing Process: Assessment

MSC: Health Promotion and Maintenance

- 6. The nurse is caring for an older adult who has been admitted to an acute care hospital for treatment of a fractured femur. The family expresses concern about their father's pending transfer to a subacute care facility. What response by the nurse is best?
 - a. "Acute care facilities lack the long-term physical therapy your dad requires."
 - b. "Your dad will be much happier in a more serene, private environment."
 - c. "The subacute facility will focus on helping your dad to maintain his independence."
 - d. "Insurance, including Medicare, will cover only a limited amount of time here."

Gerontologic Nursing 6th Edition Meiner Test Bank

ANS: C

The transfer of the patient to a subacute facility is based on the need to maintain the patient's level of function and independence, a task the acute care facility is not prepared to address once the patient is physiologically stable. The acute care facility may or may not be able to provide long-term therapy. The patient may or may not be happier in the new setting; the nurse should not make this judgment. It is true that insurance only pays for a limited amount of time in an acute care facility, but this is not the best reason for the patient to transfer.

DIF: Applying OBJ: 1-4

TOP: Integrated Process: Communication and Documentation

MSC: Health Promotion and Maintenance

- 7. To best assure both the quality of care and the safety of the older adult patient who requires in-home unlicensed assistive personal (UAP) assistance, which action by the gerontologic nurse is best?
 - a. Evaluates the competency of the UAP staff.
 - b. Assumes the roles of case manager and patient advocate.
 - c. Arranges for the needed UAP provided services.
 - d. Assesses the patient for functional limitations.

ANS: A

As more care traditionally provided by professional nurses is being transferred to UAP, the nurse must assume more responsibility for educating, training, and evaluating the competency of UAP staff to provide safe, effective care for the older adult patient.

DIF: Applying OBJN_I P5_C I_NG_TB.C_OM

TOP: Integrated Process: Communication and Documentation

MSC: Safe and Effective Care Environment

- 8. The nurse working with older adults understands what information about certification in gerontologic nursing?
 - a. It is mandatory for those in long-term care settings.
 - b. It is voluntary and shows clinical expertise in an area.
 - c. It allows nurses to be paid by third-party payers.
 - d. It allows nurses to advance their careers in a job.

ANS: B

Certification is voluntary and shows that a nurse has additional knowledge and expertise in a certain area of practice. It is not mandatory in specific care settings. It does not allow for third-party reimbursement. It may be part of a career ladder program, but that is not true of all work settings.

DIF: Remembering OBJ: 1-2

TOP: Integrated Process: Teaching-Learning MSC: Safe and Effective Care Environment

- 9. A nurse works in a gerontologic clinic. What action by the nurse takes highest priority?
 - a. Serving as a patient advocate
 - b. Educating patients about diseases

Gerontologic Nursing 6th Edition Meiner Test Bank

- c. Helping patients remain independent
- d. Referring patients to home health care

ANS: C

One of the challenges and priorities of the gerontologic nurse is helping patients to maintain their independence. While nurses do serve as patient advocates, educate patients, and make referrals, these actions are not specific to gerontologic nursing.

DIF: Remembering OBJ: 1-2

TOP: Nursing Process: Implementation MSC: Health Promotion and Maintenance

- 10. A nurse is caring for an older patient in the emergency department. What information about the patient will be most helpful in creating a plan of care?
 - a. Baseline physical and cognitive functioning
 - b. Living conditions and family support
 - c. Medications and current medical problems
 - d. Results of the Mini-Mental State Examination

ANS: A

The nurse is encouraged to view older patients as individuals and consider their baseline physical and cognitive functional status as a standard by which to compare the patient's current status. The other information is also important, but the basis of individualized care begins with the patient's strengths and weaknesses.

DIF: Applying OBJ: 1-2 TOP: Nursing Process: Assessment

MSC: Health Promotion and Maintenance

- 11. The faculty member explains to students that many older Americans continue to work past the "retirement age." What best explains this trend?
 - a. Feeling healthier longer
 - b. Changing financial outlook
 - c. Becoming bored in retirement
 - d. A desire to give back

ANS: B

As financial situations may have declined as a result of many economic factors, more older adults work past their "retirement age." The other options may be reasons for some to continue working, but financial necessity is the reason the majority continue to do so.

DIF: Remembering OBJ: 1-3

TOP: Integrated Process: Teaching-Learning MSC: Health Promotion and Maintenance

- 12. What information does the faculty member teach students about Medicare?
 - a. Covers anyone with end-stage renal disease
 - b. Part A covers some prescription costs
 - c. Part B covers inpatient hospital costs
 - d. Part D eliminates the drug "donut hole"

ANS: A
