

# TEST BANK

## ANATOMY AND PHYSIOLOGY

### OPENSTAX

# TEST BANK

## Anatomy and Physiology Openstax Test Bank

### Table of Contents:

Chapter 1	An Introduction to the Human Body
Chapter 2	The Chemical Level of Organization
Chapter 3	The Cellular Level of Organization
Chapter 4	The Tissue Level of Organization
Chapter 5	The Integumentary System
Chapter 6	Bone Tissue and the Skeletal System
Chapter 7	Axial Skeleton
Chapter 8	The Appendicular Skeleton
Chapter 9	Joints
Chapter 10	Muscle Tissue
Chapter 11	The Muscular System
Chapter 12	The Nervous System and Nervous Tissue
Chapter 13	Anatomy of the Nervous System
Chapter 14	The Somatic Nervous System
Chapter 15	The Autonomic Nervous System
Chapter 16	The Neurological Exam
Chapter 17	The Endocrine System
Chapter 18	The Cardiovascular System: Blood
Chapter 19	The Cardiovascular System: The Heart
Chapter 20	The Cardiovascular System: Blood Vessels and Circulation
Chapter 21	The Lymphatic and Immune System
Chapter 22	The Respiratory System
Chapter 23	The Digestive System
Chapter 24	Metabolism and Nutrition
Chapter 25	The Urinary System
Chapter 26	Fluid, Electrolyte, and Acid-Base Balance
Chapter 27	The Reproductive System
Chapter 28	Development and Inheritance

## Chapter 1: An Introduction to the Human Body

### Openstax: Anatomy and Physiology Test Bank

---

1. ----- is the study of the larger structures of the body, those visible without the aid of magnification

- (A) Gross anatomy
- (B) Microscopic anatomy
- (C) Macroscopic anatomy
- (D) Physical anatomy

**Ans A**                      **Diff Easy**                      **Page 8**

2. The word “anatomy” comes from a Greek root that means “ .....”

- (A) To cut apart
- (B) To fix with
- (C) To view inside
- (D) To study exterior

**Ans A**                      **Diff Easy**                      **Page 8**

3. Dissection is still used in .....

- (A) Medical schools
- (B) Pathology labs
- (C) Anatomy courses
- (D) All of above

**Ans D**                      **Diff Easy**                      **Page 8**

4. Microscopic anatomy includes .....

- (A) Histology
- (B) Cytology
- (C) Both of above
- (D) None of above

**Ans C**                      **Diff Easy**                      **Page 8**

5 ..... is the study of the structures that make up a discrete body system—that is, a group of structures that work together to perform a unique body function.

- (A) Regional anatomy
- (B) Systematic anatomy

- (C) Both of above
- (D) None of above

**Ans C**                      **Diff Easy**                      **Page 9**

6. Human physiology is the scientific study of the.....of the structures of the body and the ways in which they work together to support the functions of life.

- (A) Chemistry
- (B) Physic
- (C) Both Above
- (D) None of Above

**Ans C**                      **Diff Medium**                      **Page 9**

7. Homeostasis is the state of steady ----- maintained by living things.

- (A) Internal Condition
- (B) External conditions
- (C) Both Above
- (D) None of Above

**Ans A**                      **Diff Easy**                      **Page 9**

8. An organ is an anatomically distinct structure of the body composed of ----- tissue types.

- (A) One
- (B) Two
- (C) Two or more
- (D) None of above

**Ans C**                      **Diff Easy**                      **Page 11**

9. In -----organisms, including humans, all cells, tissues, organs, and organ systems of the body work together to maintain the life and health of the organism.

- (A) Unicellular
- (B) Bicellular
- (C) Multicellular
- (D) None of above

**Ans C**

**Diff Easy**

**Page 14**

10. The different organ systems each have different functions and therefore -----roles to perform in physiology.

- (A) Unique
- (B) Different
- (C) Both Above
- (D) None of Above

**Ans C**

**Diff Easy**

**Page14**

11. A human body consists of trillions of cells organized in a way that maintains distinct .....

- (A) Internal compartments
- (B) External compartments
- (C) Both of above
- (D) None of above

**Ans A**

**Diff Medium**

**Page 14**

12. The organism level is the .....level of organization

- (A) Lowest
- (B) Highest
- (C) Medium
- (D) Extreme

**Ans A**

**Diff Medium**

**Page 14**

13. Which of the following mechanism is involved in releasing energy?

- (A) Catabolism
- (B) Anabolism
- (C) Both of above
- (D) None of above

**Ans C**

**Diff Medium**

**Page 14**

14. Every cell in your body makes use of a chemical compound, adenosine triphosphate (ATP), to .....

- (A) Store energy
- (B) Release energy

- (C) Both of above
- (D) None of above

**Ans C**                                  **Diff Medium**                                  **Page 15**

15 .....is the ability of an organism to adjust to changes in its internal and external environments

- (A) Responsiveness
- (B) Movement
- (C) Locomotion
- (D) All of above

**Ans A**                                  **Diff Hard**                                  **Page 15**

16. Anatomic structures and physiological processes allow runners to coordinate the action of muscle groups and sweat in response to rising internal .....

- (A) Body temperature
- (B) Blood pressure
- (C) Hormone level
- (D) All of above

**Ans A**                                  **Diff Hard**                                  **Page 16**

17 .....is all of the changes the body goes through in life.

- (A) Development
- (B) Growth
- (C) Reproduction
- (D) All of above

**Ans A**                                  **Diff Medium**                                  **Page 16**

18. Development includes the process of .....

- (A) Differentiation
- (B) Growth
- (C) Repair
- (D) All of above

**Ans D**                                  **Diff Medium**                                  **Page 16**

19. Humans have been adapting to life on Earth for at least the past .....

- (A) 100000 years
- (B) 200000 years
- (C) 300000 years
- (D) 400000 years

Ans B

Diff Hard

Page 17

20. Atmospheric air is only about .....percent oxygen, but that oxygen is a key component of the chemical reactions that keep the body alive, including the reactions that produce ATP

- (A) 20
- (B) 30
- (C) 40
- (D) 60

Ans A

Diff Medium

Page 17

21. Controlled hypothermia often is used, for example, during open-heart surgery because it ..... the metabolic needs of the brain, heart, and other organs, reducing the risk of damage to them.

- (A) Decreases
- (B) Increases
- (C) Remains constant
- (D) None of above

Ans A

Diff Medium

Page 18

22. In the emergency department, the physician induces coma and lowers the patient's body temperature to approximately 91 degrees. This condition, which is maintained for 24 hours .....the patient's metabolic rate

- (A) Slows
- (B) Enhances
- (C) Neutralizes
- (D) None of above

Ans A

Diff Easy

Page 18

23. The pressure of the nitrogen gas in your blood would be much..... than the pressure of nitrogen in the space surrounding your body

- (A) Higher
